PROFILE

As a Junior Software Engineer, I have a strong foundation in HTML, CSS, PHP (Laravel), JavaScript, SQL, ReactJS, CPanel, Hostinger, Project Management, and WordPress. My experience working with local business owners as a Full Stack Engineer at ArRiyad Resources has allowed me to provide custom software solutions, including e-commerce stores, point of sale systems, and inventory management. I have also worked as a Document Controller at Padu Rok Resources, where I maintained company records and created the company's website. As an Application Engineer at LCP Buildsoft Technology, I collaborated with development teams to create sophisticated software programs for clients, utilizing PHP, NodeJS, Angular, MongoDB, and more. I have also worked as a UI/UX Designer at GR TECH, where I implemented web designs for a good user experience, using HTML, CSS, and JavaScript. Lastly, I have experience as a Frontend Web Developer at Top Click E-Services, where I developed websites using WordPress and, I hold a Bachelor's degree in Computer Science majoring in Software Engineering from Universiti Malaysia Terengganu.

EXPERIENCE

Full Stack Engineer
📅 Nov 2022 - Present

Arriyad Resources | Shah Alam, Malaysia

- Collaborated with team to analyze system solutions based on client requirements.
- Discussed project progress with customers, collected feedback on different stages and directly addressed concerns.
- Planned and developed interfaces that simplified overall management and offered ease of use.

Key Projects:

- Develop e-commerce and corporate websites using WordPress for local businesses (mashacat.com, tokanhelmet.com, hubmeal2u.com, muizhotchicken.com.my, realbeautyarby.com.my, dupdap.my, jakelmelaka.com.my, khamsiahjewellery.my, follower.my)
- Developed LMS software using MERN stack for Aster Edu (lms.aster.edu.my) to transfer the system from WordPress.
- Setup cronjobs for my.shirlynmail.com and mail.aster.edu.my

Document Controller
📅 Aug 2022 - Nov 2022

Padu Rok Resources Sdn Bhd | Johor Bahru, Malaysia

- Proofread filenames, titles and submittal details to streamline submittal and avoid rejection.
- Carefully reviewed all documents and reports for completeness and accuracy.
- Enforced use of standardized forms and templates to achieve uniformity of communications across departments and functions.
- Maintained document archive and file server of approved documents and drawings to provide easy traceability and retrievability.

Key Projects:

- Develop company corporate website using WordPress, padurokresources.com
- Provide work email to all staffs and guide staffs on how to use their email in GMail

Application Engineer
📅 Jan 2022 - Jul 2022

LCP Buildsoft Technology (M) Sdn Bhd | Klang, Malaysia

- Exhibited strong technical aptitude and application expertise resulting in optimized performance through the use of PHP-Laravel, Angular, jQuery and AndroidStudio to ensure continuous improvement recommendations and product innovation.
- Partnered with development team on product development and application support plans.
- Communicated technical development stages and provided design support to stakeholders.
- Supported software integration and implemented maintenance enhancements.

Key Projects:

- Loyalty Membership: developed using Angular, the customer part then converted to android app using Apache Cordova. Used OneSignal and Firebase for notifications.
- Whizzl Management System (businessdev.whizzl.io - staging): developed using Laravel and have to communicate with developers from Whizzl. Have to setup puTTY and access their VPN during development. Used GitLab for CI/CD.
- JSH System: developed using Laravel.
- eTicketing2u (eticketing2u.com.my): updated the UI/UX design for event ticketing, the tickets and the email confirmation.
- BBTV: developed the frontend using Reactjs for the web based application.
- Assets Management System: developed using Laravel.

UI/UX Designer (Intern)

GR Tech Sdn Bhd

- Adapted quickly to constantly changing, deadline-driven environment.
- Used content creation tools like Figma and digital media to design web sites.
- Prioritized and problem-solved several tasks concurrently with minimum supervision.
- Developed user interfaces with modern JavaScript frameworks, HTML5, and CSS3.

Key Projects:

- Zon.Tools: developed using Laravel, migrated the system from WordPress.
- AMZAlert: developed using Laravel, migrated the system from WordPress.
- Hostel Managment System (demo.grtech.com/hostel-management/student/dashboard.html) : developed using PHP
- Taylor's Exam Scheduling System (TESS) (demo.grtech.com/tess/) : worked on the UI/UX

Frontend Web Developer

Top Click E-Services Sdn Bhd

- Utilized the use of web content management system for fast paced tasks, to reach the KPI of 1 website per day.
- Shadowed developers to learn key details about job duties and tasks.
- Studied user requirements to gain strong understanding of project initiatives and deadlines.
- Boosted web traffic by improving navigation and rectifying bottlenecks.

Key Projects:

- Asia Premium Holidays (asiapremiumholidays.com): updated the UI
- Develop e-commerce and corporate websites using WordPress/easystore/shopify for local businesses (beauline-cosmetics.com, brainscienceacademy.com.my, hongfoo.com.my, rabbitcentury.easy.co, thehumblefoodco.my, eshop.turbojewellery.com, woboxaventure.easy.co)

EDUCATION

Bachelor of COMPUTER SCIENCE (SOFTWARE ENGINEERING)

UNIVERSITI MALAYSIA TERENGGANU

- Bachelor of Computer Science from UNIVERSITI MALAYSIA TERENGGANU with honours

SKILLS

AngularJS | HTML5 / CSS | Java | Javascript

Laravel | Node.js | ReactJS | MySQL

NOSQL (MongoDB, Cassandra, Elasticsearch, Hbase, DynamoDB)

JSON
