Summary

Full Stack Engineer with 4+ years of experience building and maintaining scalable web applications across frontend and backend systems. Proficient in React, Next.js, TypeScript, JavaScript, Node.js, REST APIs, SQL and NoSQL databases, cloud services, and CI/CD workflows. Experienced in AWS, Azure, Docker, GitHub/GitLab, and Agile development environments. Strong focus on performance optimization, code quality, problem solving, and end-to-end feature ownership.

Professional Experience

Full Stack Engineer

Seedflex Capital Sdn Bhd (June, 2024 - Present)

- Reviewed peer code through pull requests and code reviews, reducing production bugs by 20% and improving maintainability.
- Leveraged AI-assisted development tools including Atlassian Rovo, Gemini, and GitHub Copilot to summarize pull request changes, accelerate repository-wide issue investigation and debugging, and improve team knowledge sharing.
- Co-developed a Python-based AI incident investigation solution integrating Amazon CloudWatch, Gemini, Atlassian Rovo, and Google Chat to automate root cause analysis (RCA), incident reporting, and engineering notifications.
- Developed customer and operations-facing loan management features, streamlining drawdown, repayment, settlement, and disbursement workflows, contributing to a 40% reduction in loan processing time while supporting regulatory compliance.
- Developed and maintained scalable full stack web applications using React, TypeScript, and NestJS, designing middleware services that abstracted backend API integrations, simplified frontend development, and improved maintainability.
- Built a cross-platform testing application using Next.js and Capacitor to replicate company partner's Android WebView and iframe integration behavior, accelerating issue reproduction, debugging, and validation of production releases.
- Collaborated in Agile development processes using Bitbucket and Jira, contributing to sprint planning, technical design discussions, and cross-functional delivery of production features.
- Implemented CI/CD automation using Bitbucket Pipelines for QA deployments across nine servers, reducing manual deployment effort, improving rollout speed by 30%, and enabling real-time build monitoring through Google Chat webhook integrations.
- Supported application deployments and release management on AWS EC2 environments, contributing to reliable QA and production delivery workflows.

DevOps Engineer

Strato Solutions Sdn Bhd (August, 2023 - May, 2024)

- Led the adoption of Git, Docker, Agile practices, and modern web development frameworks across SIRIM digitalisation projects, improving engineering workflows and delivery efficiency.

- Trained 20+ developers at SIRIM on GitLab, Docker, and modern development workflows, driving adoption of DevOps best practices and improving team productivity.
- Modernized a legacy Java-based system using MongoDB, Express.js, React, Node.js, and Material UI, reducing development timelines from 6 months to 3 months while improving application performance and user experience.
- Managed Azure-hosted applications, deployment workflows, and Microsoft SQL Server databases, improving system scalability, reliability, and operational efficiency.
- Developed and deployed key modules for TNB Safety Information System (TSIS 2.0) using ASP.NET Core and Microsoft Azure, supporting enterprise digital transformation initiatives.
- Migrated TSIS 2.0 from .NET Core 2.0 to ASP.NET Core 5, modernized user interfaces using TNB's design framework, and delivered new HSE compliance-related functionality to support evolving regulatory requirements.
- Established development environments, Git repositories, and branching strategies while contributing to Figma prototypes, database design, Azure deployments, and cross-functional technical planning.

Application Engineer

LCP Buildsoft Technology (M) Sdn Bhd (February, 2022 - August, 2023)

- Delivered custom web and mobile applications using Laravel, React, Angular, and Cordova, contributing to successful project launches and reducing development time through reusable components and efficient implementation practices.
- Built, customized, and maintained 20+ MSMEs/SMEs client websites using WordPress, Shopify, Easystore, and other CMS platforms, supporting business growth and digital presence initiatives.
- Managed hosting, deployment, and maintenance for client applications and websites across DigitalOcean, Exabytes, Hostinger, Yeahhost, and GoDaddy, ensuring reliability, uptime, and operational stability.
- Integrated Firebase push notifications and Twilio SMS services into customer-facing applications, improving user engagement and communication effectiveness.
- Delivered e-commerce solutions through payment gateway, inventory management, and third-party system integrations for 5+ clients, while leading onboarding and user training efforts that achieved a 95% adoption rate.
- Managed 6–10 concurrent projects using ClickUp and Trello, coordinating stakeholders, tracking progress, and ensuring timely delivery across multiple client engagements.

Intern UI UX Designer

ParticleByte BV / GR Tech Sdn Bhd (August, 2021 - January, 2022)

- Built reusable UI component libraries, SCSS design systems, and application templates across Laravel, Angular, React, and HTML-based projects, improving development consistency and accelerating feature delivery.
- Collaborated with designers to transform Figma mockups into responsive user interfaces and delivered frontend features for multiple SaaS applications, including Amazon seller tools that integrated AWS services such as authentication, S3, and real-time data workflows.

Part Time - Front End Developer

Top Click Sdn Bhd (October, 2021 - November, 2021)

- Built and customized websites using WordPress, Shopify, Easystore, and Wix for 20+ client projects, contributing to lead generation and conversion improvements.
- Provided hosting, DNS, and basic technical support for client websites.

Award

The Seedflex Multiplier Award

Awarded by Seedflex Capital Sdn Bhd during the 2026 Annual Off-site in recognition of leading the development of an AI-powered root cause analysis (RCA) solution for the hackathon activity during the Annual Off-site. Integrating Amazon CloudWatch, Gemini, Atlassian Rovo, and Google Chat to streamline incident investigation and engineering response workflows.

Leadership Award (Client Service Excellence)

Awarded by Strato Solutions Sdn Bhd in 2023 in recognition for leading the development of a microservices project and for pioneering the use of Docker, Git and MERN stack in SIRIM Berhad

Skills

Frontend Development:

React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, Material UI, Responsive Design, Angular

Backend Development:

Node.js, Express.js, NestJS, Java (Spring Boot, JSP, Thymeleaf), Laravel, RESTful APIs

Cloud Services & DevOps:

Docker, AWS, Microsoft Azure, Google Cloud Platform (GCP), CI/CD, Bitbucket Pipelines

Database Management:

PostgreSQL, MySQL, MongoDB, Firebase (Firestore)

Tools & Collaboration:

Git (GitHub, GitLab), Bitbucket, Jira, Confluence, ClickUp, Atlassian Rovo, GitHub Copilot, Gemini CLI

Education

Bachelor's Degree of Computer Science (Software Engineering)
Universiti Malaysia Terengganu
Graduation Year: 2022

Languages

English (Fluent)
Bahasa Malaysia (Native/Fluent)
Bahasa Indonesia (Professional Working Proficiency)
Korean (Basic)
