Full Stack Engineer | Scalable Web Systems & Modern Frontend

OBJECTIVE

Full Stack Engineer with experience building scalable web applications. Proven ability to deliver reliable solutions and collaborate effectively in cross-functional teams. Seeking opportunities to contribute to impactful products and grow in a larger engineering environment. Available to start after 2 months of notice.

PROFESSIONAL EXPERIENCE

Seedflex Capital Sdn Bhd

Fullstack Engineer | June, 2024 - Now

- Reviewed and improved peer code quality, reducing production bugs by 20% and enforcing best practices.
- Assisted in AWS EC2 deployments and release processes, improving rollout speed by 30%.
- Integrated Shopify and WooCommerce APIs to automate sales reporting across 10+ stores, reducing manual workload.
- Engineered a real-time loan eligibility system, reducing processing time by 40% while ensuring regulatory compliance.
- Developed and maintained scalable full stack web applications using React, Node.js, and RESTful APIs.
- Participated in code reviews, sprint planning, and technical discussions to improve team productivity.

Strato Solutions Sdn Bhd

DevOps Engineer | August, 2023 - May, 2024

- Trained 20+ developers at SIRIM on GitLab and Docker, promoting DevOps best practices and improving team productivity.
- Modernized a legacy Java-based system using the MERN stack and Material UI, enhancing performance and user experience within 3 months.
- Deployed and managed applications on Microsoft Azure, improving system scalability and reliability.
- Developed key modules for TNB Safety Information System (TSIS 2.0) using ASP.NET Core, including deployment on Azure.
- Managed and optimized Microsoft SQL Server databases for TSIS 2.0 and SIRIM tender management systems.

LCP Buildsoft Technology (M) Sdn Bhd

Application Engineer | February, 2022 - August, 2023

- Shipped 20+ custom web and mobile applications for SMEs using Laravel, Angular, React.js, and Cordova, reducing time-to-market by 25%.
- Managed hosting and deployment for 20+ client websites across Exabytes, Yeahhost, Hostinger, and GoDaddy, ensuring uptime and stability.
- Integrated Firebase (push notifications) and Twilio (SMS services), improving user engagement by 30%.
- Delivered e-commerce solutions by integrating secure payment gateways and inventory systems for 5+ clients, and led client onboarding and training, achieving a 95% adoption rate.
- Coordinated 6–10 concurrent projects using ClickUp and Trello, ensuring on-time delivery through effective project tracking and communication.

ParticleByte BV / GR Tech Sdn Bhd

Internship - UI UX Designer | August, 2021 - January, 2022

- Designed and assembled responsive UIs using HTML5, SCSS, and JavaScript with prototypes created in Figma and managed source control with GitLab.
- Developed frontend for AMZAlert and Zon.Tools using Laravel, integrating AWS APIs (auth, S3, real-time data).
- Executed 3 production-ready features within 5 months, improving user engagement and system stability.

Top Click Sdn Bhd

Part Time - Front End Developer | October, 2021 - November, 2021

- Built static sites using WordPress, Shopify, Easystore, and WiX for 20+ client projects and customized 8 WordPress themes via Gutenberg, generating 300+ new leads in the first month post-launch.
- Spearheaded the redesign of product pages with enhanced search functionality and intuitive category navigation, resulting in a 40% reduction in bounce rate and 25% uplift in sales conversions.
- Maintained DNS settings and provided basic technical support for client hosting needs.

RELEVANT PROJECTS

TNB Technology Safety Information System 2.0 (TSIS2.0)

DevOps Engineer | January 2024 - Present

- Took part in the user requirement gathering process
- Designed database for a module
- Redesigned the given process flow to a more accurate flow
- Brainstormed the best solution with the team on daily standup meeting

SIRIM Digitalisation

DevOps Engineer | August, 2023 - December, 2023

- Upgraded existing system to new technologies, enforced the use of Git for version control, and initiated the use of frameworks for application developments
- Trained interns on web applications development
- Offered solutions to systems architecture
- Reduced project development in time by 50%, from 6 months to 3 months, by introducing Agile practices (scrum sprints, daily stand-ups) and focusing on efficient sprint planning and execution.

Aster Edu Learning Management System (lms.aster.edu.my)

Application Engineer | March, 2023 - May, 2023

- Developed using MySQL, Express.js, React.js, and Node.js (MERN stack)
- Held biweekly meetings with stakeholders to update progress and get input for changes
- Effectively used GitHub's issue tracking system to identify and resolve bugs and enhancements

AWARD

Client Service Excellence Award, Leadership Award

- Awarded by Strato Solutions Sdn Bhd in 2023
- Recognized for leading the development of a microservices project and for pioneering the use of Docker, Git and MERN stack in SIRIM Berhad

SKILLS

Frontend Development

- React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, Material UI, Responsive Design, Angular

Backend Development

- Node.js, Express.js, NestJS, Java (Spring Boot, JSP, Thymeleaf), Laravel, RESTful APIs

Cloud & DevOps

- Docker, AWS, Microsoft Azure, Google Cloud Platform (GCP), CI/CD

Database Management

- PostgreSQL, MySQL, MongoDB, Firebase (Firestore)

Tools & Collaboration

- Git (GitHub, GitLab), Bitbucket, Jira (Agile/Scrum), Confluence, ClickUp

EDUCATION

Bachelor's Degree of Computer Science (Software Engineering)

- Universiti Malaysia Terengganu
- 2018 - 2022

LANGUAGES

- Fluent: English, Bahasa Malaysia
- Professional: Bahasa Indonesia
- Conversational: Korean
- Reading Proficiency: English, Bahasa Malaysia, Bahasa Indonesia, Korean
